Rationale

Fonts and sizes were chosen through the DSFA website because the fonts were clean and professional and give a sense of continuity between the two sites.

The color palette is professional, minimal, and uses mostly subdued colors.

“High school. As children mature into adolescence, deeper, more subdued colors stimulate without leading to stress or becoming distractions. Colors such as olive green, gray and violet are good selections for high school classrooms.” -Sherman Williams <https://www.sherwin-williams.com/architects-specifiers-designers/inspiration/styles-and-techniques/sw-art-stir-kids-learn>
